

145m Ferris Wheel

Name: 145m Spokeless Ferris Wheel

Location: Entry of Bailang River, Binhai District, Weifang, Shandong Province, China

DESCRIPTION OF 145M FERRIS WHEEL

As the world's largest spokeless/shaftless Ferris Wheel (recognized by the Guinness World Record in 2018), the Bohai Eye which is 145 meters high (475ft-tall) with a completely hollow center is located in East China's Weifang city, Shandong province. The wheel is named after Bohai Sea, the northernmost coastal sea in China, along which Weifang city is built. Different from most existing Ferris wheels in operation worldwide, the Bohai Eye, certified by the Guinness Book of World Records as the highest Ferris wheel built onto a bridge, is integrated with the 540-metre-long (1,771-foot-long) Bailang River Bridge.

Thousands of tons of steel were used to create the latticed tube of the giant wheel's rim. The crisscrossing steel beams, also called 'dragon spine', hold the main structure, provide mammoth supports and make the Ferris wheel itself into a beautiful, attractive landscape. The complex architecture is vital for pulling off the shaftless design and eventually presenting a futuristic and high-tech overall appearance.

As the world's first spokeless Ferris wheel with grid design, the Bohai Eye is 10 meters (32 feet) taller than the iconic, cantilevered 'London Eye' in the British capital. All tourists will enjoy an unparalleled birds-eye view of the Bohai Gulf estuary during the 28-minute round (literally) trip. The Bohai Eye is not just a landmark of Weifang city, but has brought enormous economic benefits to the region, which further increases citizens' happiness and life satisfaction.

Headquarters Address: No. 18 Zhancheng Avenue, Taozhu Street, Zhuji City, Zhejiang Province, China, 311801

Shanghai Branch Address: C302, No.1618 Yishan Road, Minhang District, Shanghai, China, 201103

Hotline: (86)189-5752-6666/(86)133-7000-3211

TECHNICAL PARAMETERS OF 145M FERRIS WHEEL

Total height:145m

Runner diameter:125m/410ft

Cabin's running line speed:0.22m/s

Speed:30 Min/circle

The number of cabins:36sets(10 persons/set),Hang style

Passengers:36×10 person/set=360 persons

Driving power:2.2kw×4×12=105.6kw

Air condition motor:2kw×36=72kw

Main control system:5kw

Cabin and other auxiliary power:24kw

Auxiliary power:diesel generator

*Floor area:80m*90m(M²)*

Cabin: 360° transparent and panoramic spherical cabin,including air condition,video,wirelee intercom,WI-F,fire extinguisher.etc.
